Quick Reference Collection Guide: Sheep 5 pellets per adult, 7 pellets per lambs. Horses 2 nuggets per adult - For more info see attached sheet
 We use the same samples for any additional testing so extra sample is not required. After collection place in box or bag, seal well & post to StockWatch
If sending more than one box please tape them together, as this will reduce the postage costs

Account details are included at the bottom of your Invoice
Cheques & Money Orders should be made payable to StockWatch

Notes for Horse Owners: **Select Standard Test on your Test Request Form - This is our Horse Test.**

There is nothing Standard about our Horse Standard Test!

It is a sensitive, accurate method that uses more sample (min 30gms) and is therefore well suited to horses, given the large amount of fibre and the way parasites are distributed in a horse sample.

For the Farmers/Graziers: **The Standard Test - Bulked Mob Sample**

is a fast & efficient way to answer these questions...

Do I need to drench? Or Was the drench I used effective?

Please note: to test the efficacy of a drench used , a sample should be collect between 10-14 days after drenching.

Our Premium Test - *is designed for animals being run in large mobs such as sheep, goats & cattle.*

This test is generally used where a portion of animals may not be doing as well as the main mob.

By providing individual samples from both healthy & poor animals,

this test will provide a mob average plus the range.

Do you have questions? *Most of the commonly asked questions are answered in the additional paperwork provided...*

However, If you're still unsure, feel free to send an email or give us a call

We are happy to help make the process simple!

Did you know?

If you are not sure if you need additional tests, just ask. If we don't think they are required, we'll tell you.

We won't perform and charge you for testing you don't require!

If you ever misplace or want a copy of your previous test results, please get in touch.

We are only too happy to resend past results
