**Quick Reference Collection Guide:** Sheep 5 pellets per adult, 7 pellets per lamb. Horses 2 nuggets per adult - For more info see attached sheet  
We use the same samples for any additional testing so extra sample is not required. After collection place in box or bag, seal well & post to StockWatch  
**If sending more than one box please tape them together, as this will reduce the postage costs**

Please check our website or facebook page for hours during holiday periods

**Notes for Horse Owners:**      **Select Standard Test on your Test Request Form - This is our Horse Test.**

*There is nothing Standard about our Horse Standard Test!*

*It is a sensitive, accurate method that uses more sample (min 30gms) and is therefore well suited to horses, given the large amount of fibre and the way parasites are distributed in a horse sample.*

**For the Farmers/Graziers:**      **The Standard Test - Bulk Mob Sample**

*is a fast & efficient way to answer these questions...*

*Do I need to drench?      Or      Was the drench I used effective?*

*Please note: to test the efficacy of a drench used , a sample should be collect between 10-14 days after drenching.*

**Our Premium Test -** *is designed for animals being run in large mobs such as sheep, goats & cattle.*

*This test is generally used where a portion of animals may not be doing as well as the main mob.*

*By providing individual samples from both healthy & poor animals,  
this test will provide a mob average plus the range.*

**Do you have questions?** *Most of the commonly asked questions are answered in the additional paperwork provided...*

*However, If you're still unsure, feel free to send an email or give us a call*

*We are happy to help make the process simple!*

**Did you know?**

*If you are not sure if you need additional tests, just ask. If we don't think they are required, we'll tell you.*

*We won't perform and charge you for testing you don't require!*

*If you ever misplace or want a copy of your previous test results, please get in touch.*

*We are only too happy to resend past results*
